INSTRUCTIONS FOR USE EN

ANSELL GENERAL PURPOSE GLOVES & SLEEVES GP CAT II VERSION

A. Use

This Instruction for Use note is to be used in combination with the specific information that is mentioned on or inside each packaging enclosure. These gloves/sleeves are designed to protect the hands and/or arms mainly against mechanical risks and comply with the applicable harmonised EN or EN ISO Standards as shown by the pictograms being mentioned on the gloves/sleeves or packaging enclosures. The gloves/sleeves therefore will provide protection against the specific risks as shown by these pictograms which are defined by these harmonised standards. The gloves/sleeves are in conformity with the European Directive 89/686/EEC (until 21 April 2018) and the European Regulation 2016/425/EU (from 21 April 2018). Gloves/sleeves which are accompanied with the pictogram which designates contact with foodstuffs, are also in conformity with the European Regulations 1935/2004 and 2023/2006 as well as with all applicable National Regulations for Food-contact materials. Please ensure the gloves/sleeves are used only for the designated purposes, as explained above.

Explanation of symbols & pictograms:

A B C D E P EN 388: 2016	Protection from mechanical risks A: Abrasion resistance (performance levels 0 to 4) B: Blade cut resistance (performance levels 0 to 5) C: Tear resistance (performance levels 0 to 4) D: Puncture resistance (performance levels 0 to 4) E: TDM ISO EN 13997 cut resistance (performance levels A to F) P: Impact Protection (optional) = gloves providing impact protection in the knuckle area of the glove (does not apply to the finger area which cannot be tested). If no P is claimed, no impact protection applies.		If the levels under the EN 388 pictogram are marked with a prefix EU or BR or PRC ; this refers to the levels obtained respectively by the European Notified Body according EN 388:2016, by the Brazilian Certification Institute according EN 388:2003 or by the People Republic of China Certification Institute according GB 24541. **Warning**: the performance levels claimed for the gloves are based on tests performed on the palm area of the gloves. For gloves with two or more layers, these overall performance levels may not necessarily reflect the performance of the glove's outermost layer.
A B C EN 511: 2006	Protection from cold A: Convective cold (levels 0 to 4) B: Contact cold (levels 0 to 4) C: Water penetration (0 or 1) – Warning: for gloves/sleeves that are claimed with level 0, it must be noted that these may lose their cold insulative properties when wet	EN 16350:2014	Gloves/sleeves meeting the requirement (vertical resistance < 10^8 ohm); for use in areas where flammable or explosive areas exist.
CE	Product is compliant and certified to the requirements of the European Regulations on Personal Protective Equipment.	EN 420:2003 + A1:2009	Please read the Instructions for Use, prior to using the gloves/sleeves, or contact Ansell for more information
🍷🍴	Suitable for contact with foodstuffs	EAC TP TC 019/2011	Product is compliant and certified to the requirements of the Russian Custom Regulation TP TC 019/2011
KCs	Product is compliant and certified to the requirements of the Korean Occupational Health & Safety Act legislation for PPE	CA XX.XXX	Certificate of Approval, as certified to the requirements of the Brazilian Regulation (whereas xx.xxxx refers to the certificate number)
ANSI ABR	Abrasion resistance grading (levels 0 to 6) according to the American National Standard Institute 105-2016	ANSI CUT	Cut resistance grading (levels A1 to A9) according to the American National Standard Institute 105-2016

EU-Type examination certificate (Module B) by Centexbel Belgium (I.D. 0493), Technologiepark 7, B-9052 Zwijnaarde.
For more detailed information on the product's performance, please consult Ansell.
To obtain the EU-Conformity Declaration, please use the link as shown hereunder: www.ansell.com/regulatory

B. Precautions for use

1. Never use the gloves/sleeves with chemicals.
2. Before usage, inspect the gloves/sleeves for any defects or imperfections. Avoid wearing gloves/sleeves which are dirty on the inside - they may irritate the skin, causing dermatitis or worse.
3. Gloves/sleeves should not come in contact with a naked flame.
4. Contaminated gloves/sleeves should be cleaned or washed or wiped dry before removal.
5. Gloves/sleeves which have a tear level of 1 or above (as per EN 388) should not be used for protection against serrated blades or when there is a risk of entanglement with moving machine parts.
6. Not all gloves/sleeves that are suitable for contact with foodstuffs may be used against all foodstuffs. Some gloves/sleeves may show excessive migration towards certain types of foodstuffs. To know which restrictions apply and for which specific foodstuffs the gloves/sleeves can be used, please obtain advice from Ansell or consult the Ansell Food Conformity declaration.
7. If gloves/sleeves are marked, the printed surfaces shall not come in contact with food.
8. If gloves/sleeves are being used in explosive environments, please ensure they meet the EN 16350 requirements. Persons wearing these gloves should be properly earthed, e.g. by wearing adequate footwear & clothing.
   Warning: the gloves/sleeves shall not be unpacked, opened, adjusted or removed whilst in flammable or explosive atmospheres. The electrostatic properties of the gloves/sleeves might be adversely affected by ageing, wear, contamination and damage and might not be sufficient for oxygen enriched flammable atmospheres where additional assessments are necessary.

C. Ingredients / Hazardous ingredients

Some gloves/sleeves might contain ingredients which are known to be a possible cause of allergies in sensitised persons, who may develop irritant and/or allergic contact reactions. If allergic reactions should occur, obtain medical advice immediately. For more information, please contact Ansell.

D. Care instructions

Storage: Keep away from direct sunlight; store in a cool dry place and keep in the original packaging. Keep away from ozone sources. If gloves/sleeves are properly stored, as indicated above, they won't lose their performances and won't change the glove characteristics significantly. If gloves/sleeves could be affected by ageing or storage, the expiry date is mentioned on the packaging materials.

Cleaning: Gloves/sleeves that can be laundered will carry care pictograms, which will be depicted on the specific information on or inside each packaging enclosure. For these gloves/sleeves, the performance of the unused glove/sleeve will not be reduced after 1 laundering cycle. It is the customer or launderer who is responsible for the performance of the gloves/sleeves after laundering when the gloves/sleeves have already been used. Ansell cannot be held liable for this.

E. Disposal

Used gloves/sleeves may be contaminated with infectious or other hazardous materials.
Dispose of according to Local Authority Regulations. Landfill or incinerate under controlled conditions.

GANTS ET MANCHETTES ANSELL À USAGE GÉNÉRAL VERSION GP CAT. II

A. Utilisation

Le présent mode d'emploi complète les informations spécifiques mentionnées sur ou à l'intérieur de chaque niveau d'emballage. Ces gants/manchettes sont essentiellement conçus pour protéger les mains et/ou les bras contre les risques mécaniques et répondent aux normes EN ou EN ISO harmonisées applicables, dont les pictogrammes figurent sur les gants/manchettes ou leur emballage. Les gants/manchettes offriront ainsi une protection contre les risques spécifiques représentés par ces pictogrammes, tels qu'ils sont définis dans ces normes harmonisées. Les gants/manchettes sont conformes aux dispositions de la Directive européenne 89/686/CEE (jusqu'au 21 avril 2018) et du Règlement européen 2016/425 (à compter du 21 avril 2018). Les gants/manchettes porteurs du pictogramme d'aptitude au contact alimentaire respectent également les Règlements européens 1935/2004 et 2023/2006, ainsi que toutes les réglementations nationales applicables aux matériaux destinés au contact des denrées alimentaires. Nous vous demandons instamment de veiller à ce que les gants/manchettes soient utilisés uniquement dans les applications pour lesquelles ils sont prévus, comme expliqué ci-dessus.
